Diamond Jewelry Report

Report Number	112116560AB
Date	December 11, 2018
Identification	Natural Diamond

Primary Characteristics

Cut (Shape and Style)	The Eighty-Eight®
Carat Weight	1.05 Carat
Clarity Grade	I1
Color Grade	G - H

Proportions

Measurements	6.52 - 6.50 x 4.00 mm
Table	54%
Depth	61.5%
Girdle Thickness	Slightly Thick - Extra Thick Polished
Culet Size	None

Additional Characteristics

Finish	
Polish	Very Good
Symmetry	Very Good
Fluorescence	N/A

Photograph

Comments and Description

A diamond ring, set in 18 karat white gold (stamped '18K') containing 1 natural the eighty-eight® cut white diamond, as reported. The ring also contains 58 round brilliant side stones that are G - H in color, VS1 - SI1 in clarity, with a cumulative weight of 0.65 carats. Total diamond weight is 1.70 carats. Total gram weight of the ring is 5.30 grams. Jewelry setting may affect analyses.

The Eighty-Eight® is the trademarked name of a patented octagonal diamond. The Eighty-Eight® diamond has 88 facets, 30 more than the traditional round diamond. There are 41 facets on the crown, 39 facets on the pavilion and 8 facets on the girdle. The diamond cut was designed to optimize brilliance by yielding the maximum light return possible. This innovative cut adds more value than a traditional round diamond with its increased brilliance. The enchanced brilliance is easily observable, and has been confirmed in a scientific testing evironment against traditional round diamonds.
