THE CAUSE OF COLOR IN YOUR GRAY YELLOWISH GREEN DIAMOND

Gray Yellowish Green diamonds exhibit an unbelievable behavior for a diamond, as can be understood from their nickname; dramatically changing their stable color when heated or placed in darkness. Much like the mythical moonflower, which blooms at night and returns to its normal state by dawn, this transformative quality derives its value not from traditional color grades or modifiers, but from its unique ability to transform. Collectors should know that their diamonds will exhibit a different color when placed undisturbed in a safe.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

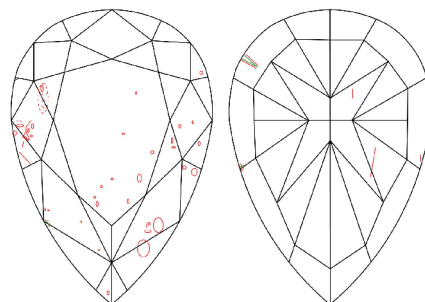

The Fancy **"Dark"** grade represents an extremely saturated and mysterious color sensation. "Dark" Gray Yellowish Green diamonds constitute just **29%** of all Gray Yellowish Green fancy color diamonds.

There are Five available saturation levels in Green color diamonds, Fancy Dark being the Five most saturated.

undefined

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

This **Pear** -shape's pavilion was modified from a brilliant facet alignment to optimize color retention, hence the name of this shape. Only **43%** from all Gray Yellowish Green fancy color diamonds are polished as a Pear shape.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority. Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The Face-up of this 1.01 carat Pear is equivalent to that of a **1.04 - 1.06** carat which is **~3.9% larger** than the average Pear shape in this weight.

Large face-up commands a Premium

THE SI2 CLARITY IN THIS FANCY DARK GRAY YELLOWISH GREEN DIAMOND

Gray Yellowish Green Fancy Color Diamonds are extremely rare in nature and achieve their value from their captivating color. Unlike colorless diamonds, the impact of low clarity in Gray Yellowish Green fancy color diamonds is negligible as long as it is not visible to the naked eye. A Fancy Dark Gray Yellowish Green with a **SI2** clarity represents 22% of all Fancy Dark Gray Yellowish Green diamonds in the 1 - 1.49 carat weight category.

F/IF Flawless / Internally flawless	VVS Very Very Slightly Included	VS Very Slightly Included	SI1 Slightly Included	SI2 Slightly Included	I Inclusion or Pique
--	--	--	---------------------------------	---------------------------------	--------------------------------

HOW RARE IS THIS 1.01 CARAT?

- Only **1 in ~ 370,000** diamonds will have similar characteristics
- A mere **4 to 8** similar diamonds enter the market yearly

The data on the Fancy Color Diamond Diary© may change from time to time and is not a guarantee or a reflection of the diamond's value. The origin of the diamond is provided solely according to the input of the person for whom the report was produced. The gemological description of the diamond is obtained from the GIA website. To maintain the accuracy and currency of the information, it is advised to periodically update the diary, especially prior to each use.
