Fancy Deep Browni...

Measurements

5.98 x 3.58 x 2.47 mm

GIA No.

1152577706

Shape & Cutting

Oval

Origin

Not Specified

THE CAUSE OF COLOR IN YOUR BROWNISH ORANGE DIAMOND

The **Orange and yellow** hues of this 0.46 carat diamond attest to the presence of nitrogen atoms that absorb blue light and create a dark yellow hue, combined with red luminescence. Diamonds with orange and brown appearance have a distinctive atomic structure that results from immense pressure that deformed their crystal lattice and led to the absorption of a broad range of colors, including purple, blue and green.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The **"Deep"** grade exhibits an extremely saturated color with a darker tone. This grade represents only **42%** of all Brownish Orange diamonds. Fancy "Deep" Brownish Orange diamonds give a profound color sensation.

There are Two available saturation levels in Orange color diamonds, Fancy Deep being the Second most saturated. Fancy Deep is as saturated as Vivid; however, it presents a darker tone.

Fancy Deep brownish-orange

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

The modified **Oval** -cut diamond is an updated version from the classic Oval Brilliant cut. The modified version has the ideal facet alignment for fancy color diamonds and will have a minimum of 59 facets. Only **10%** of all Brownish Orange fancy color diamonds are cut and polished as ovals.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority.

Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The Diamond's face-up view appears true to its carat weight.
