Color Grade

Fancy Vivid Yello...

Measurements

4.96 x 4.18 x 3.62 mm

GIA No.

1206889447

Shape & Cutting

Cushion

Origin

Not Specified

THE CAUSE OF COLOR IN YOUR YELLOWISH GREEN DIAMOND

Yellow color in diamonds is attributed to the presence of nitrogen atoms that absorb blue light in the visible spectrum. Green diamonds derive their color from the absorption of red light waves. In your diamond, subterranean radiation exposure altered its atomic structure leading to the absorption of red light by its molecules and the emergence of its distinctive color.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The **"Vivid"** grade is situated at the top of the saturation scale and, in most cases, exhibits a sensational, exciting color. "Vivid" Yellowish Green diamonds represent just **13%** of all Yellowish Green fancy color diamonds.

There are Seven available saturation levels in Green color diamonds, Fancy Vivid being the Seventh most saturated.

Faint yellow-green

Very Light yellow-green

Light yellow-green

Fancy Light yellow-green

Fancy yellow-green

Fancy Intense yellow-green

Fancy Vivid yellow-green

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

The **Cushion** shape dates back to the early days when diamonds were initially made to decorate crowns of royalty. Today, the Cushion shape is still the most popular jewelry shape, and it is also yields the highest possible weight from rough diamonds. The pavilion on the bottom of your stone has a Starburst facet alignment to reinforce color reflection and brilliance. **34%** from all Yellowish Green fancy color diamonds are polished as Cushion / Radiant.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority.

Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

*The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The face-up view of this 0.71 ct. is Significantly Smaller than Standard.

Average face-up for
this weight

Your diamond
4.96mm x 4.18mm

LEARN HOW UNIQUE IS THE WEIGHT OF A 0.71 CARAT IN YELLOWISH GREEN DIAMONDS

40.0% Of all Fancy Vivid Yellowish Green diamonds are smaller than yours

THE SI2 CLARITY IN THIS FANCY VIVID YELLOWISH GREEN DIAMOND

The impact of the **SI2** clarity, in a Fancy Vivid Yellowish Green, Cushion cut, is negligible compared to colorless diamonds especially when it is not visible to the naked eye. The SI2 clarity grade represents 3% of all Fancy Vivid Yellowish Green diamonds in the 0.70 - 0.99 carat weight category.

F/IF Flawless / Internally flawless	VVS Very Very Slightly Included	VS Very Slightly Included	SI1 Slightly Included	SI2 Slightly Included	I Inclusion or Pique

THE FAINT BLUE FLUORESCENT IN THIS DIAMOND

Fluorescence refers to the emission of visible light when a diamond is exposed to UV light. The fluorescence in this diamond is caused by the presence of trace elements within the lattice of the diamond. When a diamond is exposed to UV light, these elements absorb the energy from the UV light. They become excited, and as a result, release energy in the form of a Blue glow. The **Faint Blue** fluorescence in this 0.71 carat has no impact on its quality. It is impossible to spot a glow of this **Faint Blue** Fluorescence in the diamond without a special UV light device.

HOW RARE IS THIS 0.71 CARAT?

- Only **1 in ~ 13,000,000** diamonds will have similar characteristics
- A similar diamond enters the market once every **7 To 8 years**

RARITY GRADE
EXTREMELY RARE

The data on the Fancy Color Diamond Diary© may change from time to time and is not a guarantee or a reflection of the diamond's value. The origin of the diamond is provided solely according to the input of the person for whom the report was produced. The gemological description of the diamond is obtained from the GIA website. To maintain the accuracy and currency of the information, it is advised to periodically update the diary, especially prior to each use. For additional information about the data and other limitations, please contact us at customers@fcresearch.org.
