2.01 carat	SII	None
Color Grade	Measurements	GIA No.
Fancy Intense Ora...	7.99 x 8.47 x 4.41 mm	6173086672
Shape & Cutting	Origin	
Heart	Not Specified	

THE CAUSE OF COLOR IN YOUR ORANGY PINK DIAMOND

The combination of the pink and orange hue in your Fancy Intense **Orangy Pink** 2.01 carat diamond is caused by a fascinating geological phenomenon that occurs when certain diamonds undergo more forcible pressure and heat than others. Diamonds that are exposed to 900° Celsius and manage to withstand the immense pressure underground experience a unique change in their atomic alignment. That's when the magic happens! Scientists believe that when light enters your Fancy Intense Orangy Pink Heart diamond and crosses its special atomic distortion, the light rays bend at an angle that absorbs the green light and creates a pink color sensation. Pink diamonds that have a high amount of nitrogen, which absorbs the blue color and causes a yellow color, will lean towards a warmer hue and produce a diamond with a combination of orange and pink.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The grade "**Intense**" is the Third strongest saturation on the scale and represents **19%** of all Orangy Pink diamonds. Those graded as "Intense" Orangy Pink exhibit powerful saturation and convey a strong color sensation.

There are Four available saturation levels in Pink color diamonds, Fancy Intense being the Third most saturated.

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

Heart - shaped diamonds can be manufactured only from a particular shape of rough, and only skilled craftsmen can meticulously shape a rough diamond into a perfect figurative icon of love. The facets on the pavilion are inspired by the round brilliant cut, hence the name of this shape. Only **14%** of all Orangy Pink fancy color diamonds are cut and polished as Heart shape.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority.

Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The Face-up of this 2.01 carat Heart is equivalent to that of a **2.45 - 2.50** carat which is **~23.0% larger** than the average Heart shape in this weight.

Large face-up commands a Premium

LEARN HOW UNIQUE IS THE WEIGHT OF A 2.01 CARAT IN ORANGY PINK DIAMONDS

80.6% Of all Fancy Intense Orangy Pink diamonds are smaller than yours

THE SI1 CLARITY IN THIS FANCY INTENSE ORANGY PINK DIAMOND

Most Orangy Pink fancy color diamonds are formed under greater underground pressure relative to other diamonds. As such, many Orangy Pink rough diamonds are heavily fractured and cracked and as a result, receive a low clarity grade. Pursuing a high clarity grade during the manufacturing process usually entails a significant weight loss. Fancy Intense Orangy Pink diamonds with **SI1** clarity grade are bought widely and represent 19% of all Fancy Intense Orangy Pink diamonds in the 2 - 2.99 carat weight category.

F/IF Flawless / Internally flawless	VVS Very Very Slightly Included	VS Very Slightly Included	SI1 Slightly Included	SI2 Slightly Included	I Inclusion or Pique
--	--	--	---------------------------------	---------------------------------	--------------------------------

HOW RARE IS THIS 2.01 CARAT?

- Only **1 in ~ 10,000,000** diamonds will have similar characteristics
- A similar diamond enters the market once every **5 To 6 years**

RARITY GRADE
EXTREMELY RARE

The data on the Fancy Color Diamond Diary© may change from time to time and is not a guarantee or a reflection of the diamond's value. The origin of the diamond is provided solely according to the input of the person for whom the report was produced. The gemological description of the diamond is obtained from the GIA website. To maintain the accuracy and currency of the information, it is advised to periodically update the diary, especially prior to each use. For additional information about the data and other limitations, please contact us at customers@fcresearch.org.
