GIA SUMMARY

Carat Weight

0.70 carat

Clarity Grade

VS2

Fluorescence

Strong Yellow

Color Grade

Light Green

Measurements

7.73 x 5.06 x 2.89 mm

GIA No.

1338594388

Shape & Cutting

Pear

Origin

Not Specified

THE CAUSE OF COLOR IN YOUR GREEN DIAMOND

Green diamonds exhibit an unbelievable behavior for a diamond, as can be understood from their nickname; dramatically changing their stable color when heated or placed in darkness. Much like the mythical moonflower, which blooms at night and returns to its normal state by dawn, this transformative quality derives its value not from traditional color grades or modifiers, but from its unique ability to transform. Collectors should know that their diamonds will exhibit a different color when placed undisturbed in a safe.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The grade **"Light"** represents **1.0%** of all Green color diamonds. Those graded as "Light" Green exhibit a smooth yet elegant hue

There are Five available saturation levels in Green color diamonds, Light being the Second most saturated.

undefined

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

The **Pear** brilliant cut diamond is a classic shape that appeared in jewelry as early as the 17th century on nobles and royalty. The facet alignment on the pavilion is inspired by the classic Round brilliant, hence the name of this shape. Only **43%** from all Green fancy color diamonds are polished as Pear shape.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority. Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The Face-up of this 0.7 carat Pear is equivalent to that of a **0.89 - 0.91** carat which is **~28.5% larger** than the average Pear shape in this weight.

Large face-up commands a Premium

THE VS2 CLARITY IN THIS LIGHT GREEN DIAMOND

Green fancy color diamonds are extremely rare in nature regardless of the saturation level. Most of natural Green diamonds are not highly included. Although a **VS** clarity grade is considered a high one, it is of less importance when factoring its impact on the value of a Green diamond. A Light Green with a VS clarity represents 32% of all Light Green diamonds in the 0.70 - 0.99 carat weight category.

F/IF Flawless / Internally flawless	VVS Very Very Slightly Included	VS Very Slightly Included	SII Slightly Included	SI2 Slightly Included	I Inclusion or Pique
--	--	--	---------------------------------	---------------------------------	--------------------------------

THE STRONG YELLOW FLUORESCENT IN THIS DIAMOND

Fluorescence refers to the emission of visible light when a diamond is exposed to UV light. The fluorescence of this diamond is caused by the presence of trace elements within the lattice of the diamond. When a diamond is exposed to UV light, these elements absorb energy from the UV light. They become excited, and as a result, release energy in the form of a yellow glow. **Yellow** fluorescence reinforces the color of this Green diamond and will entail a price premium. The stronger the yellow fluorescence, the more attractive the diamond will be.

HOW RARE IS THIS 0.70 CARAT?

- Only **1 in ~ 20,000,000** diamonds will have similar characteristics
- A similar diamond enters the market once every **8 To 12 years**

RARITY GRADE
EXTREMELY RARE

The data on the Fancy Color Diamond Diary© may change from time to time and is not a guarantee or a reflection of the diamond's value. The origin of the diamond is provided solely according to the input of the person for whom the report was produced. The gemological description of the diamond is obtained from the GIA website. To maintain the accuracy and currency of the information, it is advised to periodically update the diary, especially prior to each use. For additional information about the data and other limitations, please contact us at customers@fcresearch.org.
