Shape & Cutting

Oval

Origin

Not Specified

THE CAUSE OF COLOR IN YOUR BROWN PINK DIAMOND

The combination of the pink and brown hue of your Fancy Deep **Brown Pink** 2.07 carat diamond is caused by a fascinating geological phenomenon that occurs when certain diamonds undergo more forcible pressure and heat than others. Diamonds that are exposed to 900° Celsius and manage to withstand the immense pressure underground experience a unique change in their atomic alignment. That's when the magic happens! Scientists believe that when light enters your Fancy Deep Brown Pink Oval diamond and crosses its special atomic distortion, the light rays bend at an angle that absorbs a wide range of the color spectrum of light and creates the brown color, which will result in a combination of brown and pink color sensation.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The **"Deep"** grade exhibits an extremely saturated color with a darker tone. This grade represents only **0.00%** of all Brown Pink diamonds. Fancy "Deep" Brown Pink diamonds give a profound color sensation.

Fancy Light brown-pink

Fancy brown-pink

Fancy Dark brown-pink

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

The **Oval** brilliant is, in fact, an elongated version of the classic round brilliant cut diamond. The classic Oval brilliant cut is usually performed on colorless diamonds and is yielded from elongated rough diamonds. Only **23%** of all Brown Pink fancy color diamonds are cut and polished as Ovals.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority. Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The Face-up of this 2.07 carat Oval is equivalent to that of a **2.14 - 2.18** carat which is **~4.4% larger** than the average Oval shape in this weight.

Large face-up commands a Premium

Average face-up for

LEARN HOW UNIQUE IS THE WEIGHT OF A 2.07 CARAT IN BROWN PINK DIAMONDS

82.1% Of all Fancy Deep Brown Pink diamonds are smaller than yours

THE SI2 CLARITY IN THIS FANCY DEEP BROWN PINK DIAMOND

Most Brown Pink fancy color diamonds are formed under greater underground pressure relative to other diamonds. As such, many Brown Pink rough diamonds are heavily fractured and cracked and as a result, receive a low clarity grade. Pursuing a high clarity grade during the manufacturing process usually entails a significant weight loss. The **SI2** clarity grade on your Fancy Deep Brown Pink diamond represents only 25% of all Fancy Deep Brown Pink diamonds in the 2 - 2.99 carat weight category.

THE STRONG BLUE FLUORESCENT IN THIS DIAMOND

Fluorescence refers to the emission of visible light when a diamond is exposed to UV light. The fluorescence in this diamond is caused by the presence of trace elements within the lattice of the diamond. When a diamond is exposed to UV light, these elements absorb the energy from the UV light. They become excited, and as a result, release energy in the form of a Blue glow. A **Strong Blue** Fluorescence can sometimes be seen under a direct sunlight and may temporarily weaken the saturation of this 2.07 carat diamond.

The data on the Fancy Color Diamond Diary© may change from time to time and is not a guarantee or a reflection of the diamond's value. The origin of the diamond is provided solely according to the input of the person for whom the report was produced. The gemological description of the diamond is obtained from the GIA website. To maintain the accuracy and currency of the information, it is advised to periodically update the diary, especially prior to each use. For additional information about the data and other limitations, please contact us at customers@fcresearch.org.
