Color Grade	Measurements	GIA No.
Fancy Vivid Bluis...	4.37 x 3.38 x 2.28 mm	1159909221
Shape & Cutting	Origin	
Oval	Not Specified	

THE CAUSE OF COLOR IN YOUR BLuish GREEN DIAMOND

The exceptional blend of **Blue and Green** hues in your 0.27 carat, Fancy Vivid Bluish Green diamond is the outcome of natural radiation exposure over an extended period of time, under very high temperatures. Underground radiation surrounding the diamond, coupled with extreme heat conditions lasting millions of years, altered the diamond's atomic structure to the point where it absorbs light from the red to yellow spectrum, resulting in its Green and Blue color. When diamonds that have undergone such changes, the outcome is a rare combination of green and blue colors.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The **"Vivid"** grade is situated at the top of the saturation scale and, in most cases, exhibits a sensational, exciting color. "Vivid" Bluish Green diamonds represent just **2%** of all Bluish Green fancy color diamonds. There are Five available saturation levels in Green color diamonds, Fancy Vivid being the Five most saturated.

Light bluish-green

Fancy Light bluish-green

Fancy bluish-green

Fancy Intense bluish-green

Fancy Vivid bluish-green

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

The modified **Oval** -cut diamond is an updated version from the classic Oval Brilliant cut. The modified version has the ideal facet alignment for fancy color diamonds and will have a minimum of 59 facets. Only **18%** of all Bluish Green fancy color diamonds are cut and polished as ovals.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority. Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The face-up view of this 0.27 ct. is Slightly smaller but within standard.
