THE CAUSE OF COLOR IN YOUR GRAY GREENISH YELLOW DIAMOND

Gray Greenish Yellow diamonds exhibit an unbelievable behavior for a diamond, as can be understood from their nickname; dramatically changing their stable color when heated or placed in darkness. Much like the mythical moonflower, which blooms at night and returns to its normal state by dawn, this transformative quality derives its value not from traditional color grades or modifiers, but from its unique ability to transform. Collectors should know that their diamonds will exhibit a different color when placed undisturbed in a safe.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The Fancy **"Dark"** grade represents an extremely saturated and mysterious color sensation. "Dark" Gray Greenish Yellow diamonds constitute just **29%** of all Gray Greenish Yellow fancy color diamonds.

There are Five available saturation levels in Yellow color diamonds, Fancy Dark being the Five most saturated.

undefined

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

The **Radiant** cut is a square or rectangular diamond with clipped corners, usually polished with a minimum of 59 facets. The Radiant is polished with a Starburst style pavilion, inspired by a round brilliant cut diamond, hence the name of this shape. **17%** from all Gray Greenish Yellow fancy color diamonds are polished as Cushion / Radiant.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority. Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The face-up view of this 0.55 ct. is Subtly Smaller than Standard.

THE VS2 CLARITY IN THIS FANCY DARK GRAY GREENISH YELLOW DIAMOND

Gray Greenish Yellow fancy color diamonds are extremely rare in nature regardless of the saturation level. Most of natural Gray Greenish Yellow diamonds are not highly included. Although a **VS** clarity grade is considered a high one, it is of less importance when factoring its impact on the value of a Gray Greenish Yellow diamond. A Fancy Dark Gray Greenish Yellow with a VS clarity represents 16% of all Fancy Dark Gray Greenish Yellow diamonds in the 0.50 - 0.69 carat weight category.

F/IF Flawless / Internally flawless	VVS Very Very Slightly Included	VS Very Slightly Included	SI1 Slightly Included	SI2 Slightly Included	I Inclusion or Pique

THE STRONG YELLOW FLUORESCENT IN THIS DIAMOND

Fluorescence refers to the emission of visible light when a diamond is exposed to UV light. The fluorescence of this diamond is caused by the presence of trace elements within the lattice of the diamond. When a diamond is exposed to UV light, these elements absorb energy from the UV light. They become excited, and as a result, release energy in the form of a yellow glow. **Yellow** fluorescence reinforces the color of this Gray Greenish Yellow diamond and will entail a price premium. The stronger the yellow fluorescence, the more attractive the diamond will be.

HOW RARE IS THIS 0.55 CARAT?

- Only **1 in ~ 2,000,000** diamonds will have similar characteristics
- A mere **1 to 2** similar diamonds enter the market yearly

The data on the Fancy Color Diamond Diary© may change from time to time and is not a guarantee or a reflection of the diamond's value. The origin of the diamond is provided solely according to the input of the person for whom the report was produced. The gemological description of the diamond is obtained from the GIA website. To maintain the accuracy and currency of the information, it is advised to periodically update the diary, especially prior to each use. For additional information about the data and other limitations, please contact us at customers@fcresearch.org.
