None

Color Grade

Fancy Red

Measurements

4.13 x 5.17 x 2.22 mm

GIA No.

2151727080

Shape & Cutting

Heart

Origin

Not Specified

THE CAUSE OF COLOR IN YOUR RED DIAMOND

The **Red** hue in your Fancy Red 0.30 carat diamond is caused by a fascinating geological phenomenon that occurs when certain diamonds undergo more forcible pressure and heat than others. Diamonds that are exposed to 900° Celsius and manage to withstand the immense pressure underground experience a unique change in their atomic alignment. That's when the magic happens! Scientists believe that when light enters your Fancy Red Heart diamond and crosses its special atomic distortion, the light rays bend at an angle that absorbs the full range of light besides red light waves. Red diamonds with a low amount of nitrogen produce a combination of red and purple color sensation.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

Red, in essence, is an extremely saturated hue. As such, diamonds with a red body color will be classified with the one absolute grade, which is **Fancy**.

Fancy red

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

Heart - shaped diamonds can be manufactured only from a particular shape of rough, and only skilled craftsmen can meticulously shape a rough diamond into a perfect figurative icon of love. The facets on the pavilion are inspired by the round brilliant cut, hence the name of this shape. Only **27%** of all Red fancy color diamonds are cut and polished as Heart shape.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority. Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The Face-up of this 0.3 carat Heart is equivalent to that of a **0.43 - 0.44** carat which is **~46.2% larger** than the average Heart shape in this weight.

Large face-up commands a Premium

Average face-up for
this weight

THE I1 CLARITY IN THIS FANCY RED DIAMOND

Most Red fancy color diamonds are formed under greater underground pressure relative to other diamonds. As such, many Red rough diamonds are heavily fractured and cracked and as a result, receive a low clarity grade. Pursuing a high clarity grade during the manufacturing process usually entails a significant weight loss. The **Included** clarity grade on your Fancy Red diamond represents 49% of all Fancy Red diamonds in the 0 - 0.30 carat weight category.

F/IF Flawless / Internally flawless	VVS Very Very Slightly Included	VS Very Slightly Included	SI1 Slightly Included	SI2 Slightly Included	I Inclusion or Pique
--	--	--	---------------------------------	---------------------------------	--------------------------------

HOW RARE IS THIS 0.30 CARAT?

- Only **1 in ~ 4,000,000** diamonds will have similar characteristics
- A similar diamond enters the market once every **2 To 3 years**

RARITY GRADE
EXTREMELY RARE

The data on the Fancy Color Diamond Diary© may change from time to time and is not a guarantee or a reflection of the diamond's value. The origin of the diamond is provided solely according to the input of the person for whom the report was produced. The gemological description of the diamond is obtained from the GIA website. To maintain the accuracy and currency of the information, it is advised to periodically update the diary, especially prior to each use. For additional information about the data and other limitations, please contact us at customers@fcresearch.org.
