Fancy Light Gray ...

Measurements

3.35 x 3.33 x 2.23 mm

GIA No.

5221826978

Shape & Cutting

Radiant

Origin

Not Specified

THE CAUSE OF COLOR IN YOUR GRAY BLUE DIAMOND

The **Blue and Gray** color of your 0.20 carat Radiant shape diamond has a blueprint of the ocean, as it emanates from a significant amount of boron that originated from the prehistoric ocean floor. Boron atoms lead to the absorption of yellow light, which is at the opposite end of the color spectrum from blue. In some cases hydrogen is responsible for the gray color.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The grade "**Fancy Light**" represents **52%** of all Gray Blue fancy Color diamonds. Although referred to as "Fancy Light", these diamonds may exhibit a prominent hue, transcending color effectively

There are Three available saturation levels in Blue color diamonds, Fancy Light being the First most saturated.

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

The **Radiant** cut is a square or rectangular diamond with clipped corners, usually polished with a minimum of 59 facets. The term 'modified' refers to the fact that this stone is a modified version of the traditional rectangular Emerald-cut diamond. The Radiant is polished with a Starburst style pavilion as it creates a star shape when viewed through the table. This facet alignment is ideal for fancy color diamonds and gives the stone a special brilliance.

Only **34%** from all Gray Blue fancy color diamonds are polished as Cushion / Radiant.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority.

Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The Face-up of this 0.2 carat Radiant is equivalent to that of a **0.22 - 0.23 carat** which is **~12.0% larger** than the average Radiant shape in this weight.

Large face-up commands a Premium
