Fancy Deep Blue

Measurements

7.70 x 4.58 x 2.47 mm

GIA No.

2235297734

Shape & Cutting

Pear

Origin

Not Specified

THE CAUSE OF COLOR IN YOUR BLUE DIAMOND

The **Blue** color of your 0.56 carat Pear shape diamond has a blueprint of the ocean, as it emanates from a significant amount of boron that originated from the prehistoric ocean floor. Boron atoms lead to the absorption of yellow light, which is at the opposite end of the color spectrum from blue.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The **"Deep"** grade exhibits an extremely saturated color with a darker tone. This grade represents only **4%** of all Blue diamonds. Fancy "Deep" Blue diamonds give a profound color sensation.

There are Eight available saturation levels in Blue color diamonds, Fancy Deep being the Eighth most saturated. Fancy Deep is as saturated as Vivid; however, it presents a darker tone.

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

The **Pear** brilliant cut diamond is a classic shape that appeared in jewelry as early as the 17th century on nobles and royalty. The facet alignment on the pavilion is inspired by the classic Round brilliant, hence the name of this shape. Only **22%** from all Blue fancy color diamonds are polished as Pear shape.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority. Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The Face-up of this 0.56 carat Pear is equivalent to that of a **0.76 - 0.78** carat which is **~37.6% larger** than the average Pear shape in this weight.

Large face-up commands a Premium

x 4.58mm

LEARN HOW UNIQUE IS THE WEIGHT OF A 0.56 CARAT IN BLUE DIAMONDS

33.6% Of all Fancy Deep Blue diamonds
are smaller than yours

THE VS1 CLARITY IN THIS FANCY DEEP BLUE DIAMOND

Blue fancy color diamonds are extremely rare in nature regardless of the saturation level. Most of natural Blue diamonds are not highly included. Although a **VS** clarity grade is considered a high one, it is of less importance when factoring its impact on the value of a Blue diamond. A Fancy Deep Blue with a VS clarity represents 25% of all Fancy Deep Blue diamonds in the 0.50 - 0.69 carat weight category.

F/IF Flawless / Internally flawless	VVS Very Very Slightly Included	VS Very Slightly Included	SI1 Slightly Included	SI2 Slightly Included	I Inclusion or Pique
--	--	--	---------------------------------	---------------------------------	--------------------------------

HOW RARE IS THIS 0.56 CARAT?

- Only **1 in ~ 2,000,000** diamonds will have similar characteristics
- A mere **1 to 2** similar diamonds enter the market yearly

The data on the Fancy Color Diamond Diary© may change from time to time and is not a guarantee or a reflection of the diamond's value. The origin of the diamond is provided solely according to the input of the person for whom the report was produced. The gemological description of the diamond is obtained from the GIA website. To maintain the accuracy and currency of the information, it is advised to periodically update the diary, especially prior to each use.
