Fancy Intense Blu...

Measurements

5.33 x 3.06 x 2.13 mm

GIA No.

7235074747

Shape & Cutting

Pear

Origin

Not Specified

THE CAUSE OF COLOR IN YOUR BLUE DIAMOND

The **Blue** color of your 0.25 carat Pear shape diamond has a blueprint of the ocean, as it emanates from a significant amount of boron that originated from the prehistoric ocean floor. Boron atoms lead to the absorption of yellow light, which is at the opposite end of the color spectrum from blue.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The grade **"Intense"** is the Sixth strongest saturation on the scale and represents **13%** of all Blue diamonds. Those graded as "Intense" Blue exhibit powerful saturation and convey a strong color sensation.

There are Seven available saturation levels in Blue color diamonds, Fancy Intense being the Sixth most saturated.

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

This **Pear** -shape's pavilion was modified from a brilliant facet alignment to optimize color retention, hence the name of this shape. Only **22%** from all Blue fancy color diamonds are polished as a Pear shape.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority. Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The Diamond's face-up view appears true to its carat weight.

LEARN HOW UNIQUE IS THE WEIGHT OF A 0.25 CARAT IN BLUE DIAMONDS

0.0% Of all Fancy Intense Blue diamonds are
smaller than yours

THE VVS1 CLARITY IN THIS FANCY INTENSE BLUE DIAMOND

Blue fancy color diamonds are extremely rare in nature and most of them are not very included. As such, a **VVS** clarity grade, is of less importance when factoring its impact on value. A Fancy Intense Blue with a VVS clarity represents 28% of all Fancy Intense Blue diamonds in the 0 - 0.30 carat weight category.

F/IF Flawless / Internally flawless	VVS Very Very Slightly Included	VS Very Slightly Included	SI1 Slightly Included	SI2 Slightly Included	I Inclusion or Pique
---	--	---------------------------------	--------------------------	--------------------------	-------------------------

HOW RARE IS THIS 0.25 CARAT?

- Only **1 in ~ 2,000,000** diamonds will have similar characteristics
- A mere **1 to 2** similar diamonds enter the market yearly

The data on the Fancy Color Diamond Diary© may change from time to time and is not a guarantee or a reflection of the diamond's value. The origin of the diamond is provided solely according to the input of the person for whom the report was produced. The gemological description of the diamond is obtained from the GIA website. To maintain the accuracy and currency of the information, it is advised to periodically update the diary, especially prior to each use. For additional information about the data and other limitations, please contact us at customers@fcresearch.org.
