Version

## GIA SUMMARY

### Carat Weight

0.55 carat

### Clarity Grade

Internally Flawless

### Fluorescence

Faint

### Color Grade

Fancy Yellow

### Measurements

6.15 x 3.85 x 2.71 mm

### GIA No.

7235040869

### Shape & Cutting

Oval

### Origin

Not Specified

## THE CAUSE OF COLOR IN YOUR YELLOW DIAMOND

The **Yellow** color of your natural 0.55 carat, Fancy Yellow is attributed to a significant concentration of nitrogen atoms within its structure. These atoms absorb blue light, giving the diamond its distinct yellow hue. The intensity of the yellow color increases with the concentration of nitrogen in the diamond. Therefore, a higher concentration of nitrogen results in a more vibrant yellow appearance.

## A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The grade '**Fancy**' represents a level with a significant presence of color and accounts for **36%** of all Yellow fancy Color diamonds.

There are Four available saturation levels in Yellow color diamonds, Fancy being the Second most saturated.

Fancy Light yellow

Fancy yellow

Fancy Intense yellow

Fancy Vivid yellow

## THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

The modified **Oval** -cut diamond is an updated version from the classic Oval Brilliant cut. The modified version has the ideal facet alignment for fancy color diamonds and will have a minimum of 59 facets. Only **10%** of all Yellow fancy color diamonds are cut and polished as ovals.

## TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority. Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

\* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The face-up view of this 0.55 ct. is Slightly smaller but within standard.

Average face-up for  
this weight

Your diamond  
6.15mm x 3.85mm

## LEARN HOW UNIQUE IS THE WEIGHT OF A 0.55 CARAT IN YELLOW DIAMONDS

**14.3%** Of all Fancy Yellow diamonds are  
smaller than yours

## THE IF CLARITY IN THIS FANCY YELLOW DIAMOND

Your **Internally Flawless** Fancy Yellow with the Oval shape cut has no internal or external inclusions that can be seen with a professional X10 magnifying glass. Only 2% of all Fancy Yellow diamonds in the 0.50 - 0.69 carat weight category have this extremely rare clarity grade.

## THE FAINT BLUE FLUORESCENT IN THIS DIAMOND

Fluorescence refers to the emission of visible light when a diamond is exposed to UV light. The fluorescence in this diamond is caused by the presence of trace elements within the lattice of the diamond. When a diamond is exposed to UV light, these elements absorb the energy from the UV light. They become excited, and as a result, release energy in the form of a Blue glow. The **Faint Blue** fluorescence in this 0.55 carat has no impact on its quality. It is impossible to spot a glow of this **Faint Blue** Fluorescence in the diamond without a special UV light device.

## HOW RARE IS THIS 0.55 CARAT?

- Only **1 in ~ 280,000** diamonds will have similar characteristics
- A mere **5 to 10** similar diamonds enter the market yearly

The data on the Fancy Color Diamond Diary© may change from time to time and is not a guarantee or a reflection of the diamond's value. The origin of the diamond is provided solely according to the input of the person for whom the report was produced. The gemological description of the diamond is obtained from the GIA website. To maintain the accuracy and currency of the information, it is advised to periodically update the diary, especially prior to each use.
