THE CAUSE OF COLOR IN YOUR PINK PURPLE DIAMOND

The combination of the pink and purple hue in your Fancy Intense **Pink Purple** 0.25 carat diamond is caused by a fascinating geological phenomenon that occurs when certain diamonds undergo more forcible pressure and heat than others. Diamonds that are exposed to 900° Celsius and manage to withstand the immense pressure underground experience a unique change in their atomic alignment. That's when the magic happens! Scientists believe that when light enters your Fancy Intense Pink Purple Cushion diamond and crosses its special atomic distortion, the light rays bend at an angle that absorbs the green light and creates light waves. Pink diamonds that have a low amount of nitrogen, responsible for the yellow color sensation, will produce a 'colder' that leans towards the purple spectrum.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The grade "**Intense**" is the Third strongest saturation on the scale and represents **26%** of all Pink Purple diamonds. Those graded as "Intense" Pink Purple exhibit powerful saturation and convey a strong color sensation.

There are Four available saturation levels in Purple color diamonds, Fancy Intense being the Third most saturated.

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

The **Cushion** shape dates back to the early days when diamonds were initially made to decorate crowns of royalty. Today, the Cushion shape is still the most popular jewelry shape, and it is also yields the highest possible weight from rough diamonds. The pavilion on the bottom of your stone has a Starburst facet alignment to reinforce color reflection and brilliance. **27%** from all Pink Purple fancy color diamonds are polished as Cushion / Radiant.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority. Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The Face-up of this 0.25 carat Cushion is equivalent to that of a **0.27 - 0.27** carat which is **~8.1% larger** than the average Cushion shape in this weight.

Large face-up commands a Premium

LEARN HOW UNIQUE IS THE WEIGHT OF A 0.25 CARAT IN PINK PURPLE DIAMONDS

0.0% Of all Fancy Intense Pink Purple diamonds are smaller than yours

THE VS1 CLARITY IN THIS FANCY INTENSE PINK PURPLE DIAMOND

Most Pink Purple fancy color diamonds are formed under greater underground pressure relative to other diamonds. As such, many Pink Purple rough diamonds are heavily fractured and cracked and as a result, receive a low clarity grade. Pursuing a high clarity grade during the manufacturing process usually entails a significant weight loss. The **VS** clarity grade on your Fancy Intense Pink Purple diamond is considered a very high clarity grade for a Pink Purple Fancy Intense color diamond and represents only 15% of all Fancy Intense Pink Purple diamonds in the 0 - 0.30 carat weight category.

F/IF Flawless / Internally flawless	VVS Very Very Slightly Included	VS Very Slightly Included	SI1 Slightly Included	SI2 Slightly Included	I Inclusion or Pique
--	--	--	---------------------------------	---------------------------------	--------------------------------

HOW RARE IS THIS 0.25 CARAT?

- Only **1 in ~ 330,000** diamonds will have similar characteristics
- A mere **4 to 8** similar diamonds enter the market yearly

The data on the Fancy Color Diamond Diary© may change from time to time and is not a guarantee or a reflection of the diamond's value. The origin of the diamond is provided solely according to the input of the person for whom the report was produced. The gemological description of the diamond is obtained from the GIA website. To maintain the accuracy and currency of the information, it is advised to periodically update the diary, especially prior to each use.
