## GIA SUMMARY

### Carat Weight

1.01 carat

### Clarity Grade

VS2

### Fluorescence

Strong Yellow

### Color Grade

Fancy Deep Yellow

### Measurements

8.02 x 5.26 x 3.41 mm

### GIA No.

6237162161

### Shape & Cutting

Pear

### Origin

Not Specified

## THE CAUSE OF COLOR IN YOUR YELLOW DIAMOND

The **Yellow** color of your natural 1.01 carat, Fancy Deep Yellow is attributed to a significant concentration of nitrogen atoms within its structure. These atoms absorb blue light, giving the diamond its distinct yellow hue. The intensity of the yellow color increases with the concentration of nitrogen in the diamond. Therefore, a higher concentration of nitrogen results in a more vibrant yellow appearance.

## A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The **"Deep"** grade exhibits an extremely saturated color with a darker tone. This grade represents only **4%** of all Yellow diamonds. Fancy "Deep" Yellow diamonds give a profound color sensation.

There are Five available saturation levels in Yellow color diamonds, Fancy Deep being the Five most saturated. Fancy Deep is as saturated as Vivid; however, it presents a darker tone.

Fancy Light yellow

Fancy yellow

Fancy Intense yellow

Fancy Vivid yellow

Fancy Deep yellow

## THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

This **Pear** -shape's pavilion was modified from a brilliant facet alignment to optimize color retention, hence the name of this shape. Only **16%** from all Yellow fancy color diamonds are polished as a Pear shape.

## TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority. Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

\* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The Diamond's face-up view appears true to its carat weight.

Average face-up for  
this weight

Your diamond  
8.02mm x 5.26mm

## LEARN HOW UNIQUE IS THE WEIGHT OF A 1.01 CARAT IN YELLOW DIAMONDS

**59.1%** Of all Fancy Deep Yellow diamonds  
are smaller than yours

This 1.01 ct

## THE VS2 CLARITY IN THIS FANCY DEEP YELLOW DIAMOND

The **VS** clarity in your Fancy Deep Yellow with Pear shape cut represents only 50% of all Fancy Deep Yellow diamonds in the 1 - 1.49 carat weight category.

## THE STRONG YELLOW FLUORESCENT IN THIS DIAMOND

Fluorescence refers to the emission of visible light when a diamond is exposed to UV light. The fluorescence of this diamond is caused by the presence of trace elements within the lattice of the diamond. When a diamond is exposed to UV light, these elements absorb energy from the UV light. They become excited, and as a result, release energy in the form of a yellow glow. **Yellow** fluorescence reinforces the color of this Yellow diamond and will entail a price premium. The stronger the yellow fluorescence, the more attractive the diamond will be.

## HOW RARE IS THIS 1.01 CARAT?

- Only **1 in ~ 80,000** diamonds will have similar characteristics
- A mere **22 to 28** similar diamonds enter the market yearly

RARITY GRADE  
**EXTRAORDINARY**

The data on the Fancy Color Diamond Diary© may change from time to time and is not a guarantee or a reflection of the diamond's value. The origin of the diamond is provided solely according to the input of the person for whom the report was produced. The gemological description of the diamond is obtained from the GIA website. To maintain the accuracy and currency of the information, it is advised to periodically update the diary, especially prior to each use.
