Cushion

Origin

Not Specified

THE CAUSE OF COLOR IN YOUR GRAY VIOLET DIAMOND

Diamonds that originated from the Argyle Diamond Mine in Western Australia and have a color combination that includes gray, violet, or blue get their color from hydrogen atoms that were trapped in the diamond during the crystallization process in combination with a deformed atomic structure.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The grade '**Fancy**' represents a level with a significant presence of color and accounts for **81%** of all Gray Violet fancy Color diamonds.

There are Two available saturation levels in Violet color diamonds, Fancy being the First most saturated.

undefined

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

The Cushion shape dates back to the early days when diamonds were initially used to adorn royalty's crowns. Today, it remains the most popular diamond shape in fancy color jewelry. This shape also allows for a high yield from a typical rough diamond. The pavilion at the bottom of your stone possesses a distinctive facet alignment that enhances color reflection and brilliance. With a straight outline and rounded corners in the four curved areas, it retains its unique appeal. Although the GIA does not officially classify this shape as a Cushion, it is commonly referred to as one.

LEARN HOW UNIQUE IS THE WEIGHT OF A 0.14 CARAT IN GRAY VIOLET DIAMONDS

0.0% Of all Fancy Gray Violet diamonds are
smaller than yours

The data on the Fancy Color Diamond Diary© may change from time to time and is not a guarantee or a reflection of the diamond's value. The origin of the diamond is provided solely according to the input of the person for whom the report was produced. The gemological description of the diamond is obtained from the GIA website. To maintain the accuracy and currency of the information, it is advised to periodically update the diary, especially prior to each use. For additional information about the data and other limitations, please contact us at customers@fcresearch.org.
