Shape & Cutting

Cushion

Origin

Not Specified

THE CAUSE OF COLOR IN YOUR PURPLE PINK DIAMOND

The pink hue of your Fancy Deep **Purple Pink** 0.25 carat diamond is caused by a fascinating geological phenomenon that occurs when certain diamonds undergo more forcible pressure and heat than others. Diamonds that are exposed to 900° Celsius and manage to withstand the immense pressure underground experience a unique change in their atomic alignment. That's when the magic happens! Scientists believe that when light enters your Fancy Deep Purple Pink Cushion diamond and crosses its special atomic distortion, the light rays bend at an angle and absorb the green light, creating light waves ranging from red to violet and purple color.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The **"Deep"** grade exhibits an extremely saturated color with a darker tone. This grade represents only **2%** of all Purple Pink diamonds. Fancy "Deep" Purple Pink diamonds give a profound color sensation.

There are Eight available saturation levels in Pink color diamonds, Fancy Deep being the Eighth most saturated. Fancy Deep is as saturated as Vivid; however, it presents a darker tone.

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

The **Cushion** shape dates back to the early days when diamonds were initially made to decorate crowns of royalty. Today, the Cushion shape is still the most popular jewelry shape, and it is also yields the highest possible weight from rough diamonds. The pavilion on the bottom of your stone has a Starburst facet alignment to reinforce color reflection and brilliance. **25%** from all Purple Pink fancy color diamonds are polished as Cushion / Radiant.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority.

Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The face-up view of this 0.25 ct. is Moderately below standard.

LEARN HOW UNIQUE IS THE WEIGHT OF A 0.25 CARAT IN PURPLE PINK DIAMONDS

0.0% Of all Fancy Deep Purple Pink diamonds are smaller than yours

THE I1 CLARITY IN THIS FANCY DEEP PURPLE PINK DIAMOND

Most Purple Pink fancy color diamonds are formed under greater underground pressure relative to other diamonds. As such, many Purple Pink rough diamonds are heavily fractured and cracked and as a result, receive a low clarity grade. Pursuing a high clarity grade during the manufacturing process usually entails a significant weight loss. The **Included** clarity grade on your Fancy Deep Purple Pink diamond represents 33% of all Fancy Deep Purple Pink diamonds in the 0 - 0.30 carat weight category.

F/IF Flawless / Internally flawless	VVS Very Very Slightly Included	VS Very Slightly Included	S11 Slightly Included	S12 Slightly Included	I Inclusion or Pique
---	---------------------------------------	---------------------------------	--------------------------	--------------------------	-------------------------

HOW RARE IS THIS 0.25 CARAT?

- Only **1 in ~ 2,000,000** diamonds will have similar characteristics
- A mere **1 to 2** similar diamonds enter the market yearly

The data on the Fancy Color Diamond Diary© may change from time to time and is not a guarantee or a reflection of the diamond's value. The origin of the diamond is provided solely according to the input of the person for whom the report was produced. The gemological description of the diamond is obtained from the GIA website. To maintain the accuracy and currency of the information, it is advised to periodically update the diary, especially prior to each use.
