Shape & Cutting

Radiant

Origin

Not Specified

THE CAUSE OF COLOR IN YOUR BLUE DIAMOND

The **Blue** color of your 1.13 carat Radiant shape diamond has a blueprint of the ocean, as it emanates from a significant amount of boron that originated from the prehistoric ocean floor. Boron atoms lead to the absorption of yellow light, which is at the opposite end of the color spectrum from blue.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The grade '**Fancy**' represents a level with a significant presence of color and accounts for **10%** of all Blue fancy Color diamonds.

There are Seven available saturation levels in Blue color diamonds, Fancy being the Five most saturated.

Faint blue

Very Light blue

Light blue

Fancy Light blue

Fancy blue

Fancy Intense blue

Fancy Vivid blue

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

The **Radiant** cut is a square or rectangular diamond with clipped corners, usually polished with a minimum of 59 facets. The Radiant is polished with a Starburst style pavilion, inspired by a round brilliant cut diamond, hence the name of this shape. **25%** from all Blue fancy color diamonds are polished as Cushion / Radiant.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority. Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The Face-up of this 1.13 carat Radiant is equivalent to that of a **1.22 - 1.25 carat** which is **~9.4% larger** than the average Radiant shape in this weight.

Large face-up commands a Premium

Average face-up for
