Origin

Not Specified

THE CAUSE OF COLOR IN YOUR BLUE DIAMOND

The **Blue** color of your 0.52 carat Pear shape diamond has a blueprint of the ocean, as it emanates from a significant amount of boron that originated from the prehistoric ocean floor. Boron atoms lead to the absorption of yellow light, which is at the opposite end of the color spectrum from blue.

A WORD ABOUT THE SATURATION OF YOUR DIAMOND

The grade **"Intense"** is the Sixth strongest saturation on the scale and represents **13%** of all Blue diamonds. Those graded as "Intense" Blue exhibit powerful saturation and convey a strong color sensation.

There are Seven available saturation levels in Blue color diamonds, Fancy Intense being the Sixth most saturated.

Faint blue

Very Light blue

Light blue

Fancy Light blue

Fancy Intense blue

Fancy Vivid blue

THE FUNDAMENTALS OF THIS DIAMOND'S SHAPE

A mixed cut pear shape is the updated version of the classic pear shape diamond. With a step cut crown and a starburst alignment on the pavilion. This sought-after shape is polished in that manner to maintain color and add luster to a fancy color diamond. Some of the facets on this Pear shape are fashioned in steps, hence the name of this shape. Only **22%** from all Blue fancy color diamonds are polished as Pear shape.

TRUE FACE-UP

The carat weight and physical size of a diamond are important factors in determining its value. However, when it comes to fancy colored diamonds, there is a tendency to prioritize other visual elements over their size, and as a result, the surface area of the face-up view is not always given high priority.

Diamonds that appear slightly smaller are considered to be within the norm. However, diamonds that appear larger in relation to their weight will receive a premium.

* The data in this section pertains to the relationship between your diamond's face-up dimensions and the average face-up dimensions for relevant weight categories.

The Face-up of this 0.52 carat Pear is equivalent to that of a **0.60 - 0.61 carat** which is **~15.8% larger** than the average Pear shape in this weight.

Large face-up commands a Premium

33.6% Of all Fancy Intense Blue diamonds
are smaller than yours

THE SI2 CLARITY IN THIS FANCY INTENSE BLUE DIAMOND

Blue Fancy Color Diamonds are extremely rare in nature and achieve their value from their captivating color. Unlike colorless diamonds, the impact of low clarity in Blue fancy color diamonds is negligible as long as it is not visible to the naked eye. A Fancy Intense Blue with a **SI2** clarity represents 12% of all Fancy Intense Blue diamonds in the 0.50 - 0.69 carat weight category.

F/IF Flawless / Internally flawless	VVS Very Very Slightly Included	VS Very Slightly Included	SI1 Slightly Included	SI2 Slightly Included	I Inclusion or Pique
--	--	--	---------------------------------	---------------------------------	--------------------------------

HOW RARE IS THIS 0.52 CARAT?

- Only **1 in ~ 2,000,000** diamonds will have similar characteristics
- A mere **1 to 2** similar diamonds enter the market yearly

The data on the Fancy Color Diamond Diary© may change from time to time and is not a guarantee or a reflection of the diamond's value. The origin of the diamond is provided solely according to the input of the person for whom the report was produced. The gemological description of the diamond is obtained from the GIA website. To maintain the accuracy and currency of the information, it is advised to periodically update the diary, especially prior to each use.
