

Diamond Jewelry Report

Report Number 112116381AB

Date November 29, 2018

Identification Natural Diamond

Primary Characteristics

Cut (Shape and Style) The Eighty-Eight®

Carat Weight 1.03 Carat

Clarity Grade I1

Color Grade O - P

Proportions

Measurements 6.67 - 6.65 x 3.99 mm

Table 56%

Depth 60.0%

Girdle Thickness Slightly Thick - Extra Thick Polished

Culet Size None

Additional Characteristics

Finish

Polish Very Good

Symmetry Excellent

Fluorescence Faint

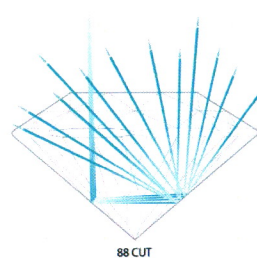

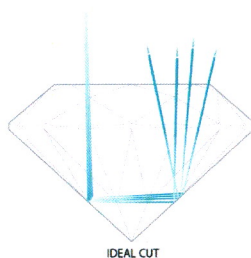

Photograph

Comments and Description

A diamond ring, set in 18 karat rose gold (stamped '18K') containing 1 natural the eighty-eight® cut white diamond, as reported. The ring also contains 34 round brilliant side stones that are G - H in color, VS2 - SI1 in clarity, with a cumulative weight of 0.50 carats. Total diamond weight is 1.53 carats. Total gram weight of the ring is 3.80 grams. Jewelry setting may affect analyses.

The Eighty-Eight® is the trademarked name of a patented octagonal diamond. The Eighty-Eight® diamond has 88 facets, 30 more than the traditional round diamond. There are 41 facets on the crown, 39 facets on the pavilion and 8 facets on the girdle. The diamond cut was designed to optimize brilliance by yielding the maximum light return possible. This innovative cut adds more value than a traditional round diamond with its increased brilliance. The enhanced brilliance is easily observable, and has been confirmed in a scientific testing environment against traditional round diamonds.
