A pair of diamond studs, set in 18 karat white gold (stamped '18K') containing 2 natural the eighty-eight® cut white diamonds, as reported. Total gram weight of the studs is 1.50 grams. Jewelry setting may affect analyses.

Photograph

Faceting Diagram The Eighty-Eight®

The Eighty-Eight® is the trademarked name of a patented octagonal diamond. The Eighty-Eight® diamond has 88 facets, 30 more than the traditional round diamond. There are 41 facets on the crown, 39 facets on the pavilion and 8 facets on the girdle. The diamond cut was designed to optimize brilliance by yielding the maximum light return possible. This innovative cut adds more value than a traditional round diamond with its increased brilliance. The enhanced brilliance is easily observable, and has been confirmed in a scientific testing environment against traditional round diamonds.
