Appendix to report No. GRS2022-026588

GRS Laboratories examined a 1.34 ct natural ruby, described in report number GRS2022-026588, that exhibited very good brilliancy and ideal proportions, making it worthy of receiving the GRS brilliancy designation of “vibrant”.

“Vibrant” is an attribute given to gemstones that display a high amount of color reflection – as opposed to the separately considered category of color saturation. A “vibrant” appearance is achieved through the skillful cutting of a gemstone to its optimal proportions, resulting in greater-than-usual weight loss and a maximized reflection pattern

This vivid red Mozambique ruby is reminiscent in color saturation of “GRS-type pigeon blood ruby” (without strong fluorescence).
